

PORUMAVILLA MADHAVAN

Computer Science Student | Aspiring Web Developer | Game Graphics Enthusiast

Chennai, India | madhavan.p-29@scds.saiuniversity.edu.in | github.com/madhav1-007

Profile

Computer Science student currently in Semester 3 at Sai University, Chennai. Passionate about coding, software development, web development, problem solving, and game graphics. Skilled in C and Python, with Java and HTML currently being learned. Interested in creating practical applications and interactive digital experiences.

Education

Sai University
Chennai, India

Undergraduate Student
Currently pursuing studies | Semester 3

Academic Performance

Semester 1 GPA: 6.7 | Semester 2 GPA: 7.4

Technical Skills

Programming Languages	C, Python
Currently Learning	Java, HTML
Core Interests	Web Development, Game Graphics
Foundations	Problem Solving, Algorithms, Programming Logic
Tools & Platforms	GitHub, Command Line Development

Selected Programming Projects

Number Guessing Game — Python

Built a command-line game using random number generation, loops, conditional logic, and user input.

To-Do List Application — Python

Created a terminal-based task manager with functionality to add, view, and remove tasks.

Student Grade Calculator — C

Developed a program that accepts marks, calculates the average, and displays a corresponding grade.

Contact Management System — C

Practiced structures, arrays, input handling, and menu-driven program design to manage contacts.

Linked List Data Structure — C

Implemented nodes, pointers, dynamic memory allocation, traversal, and memory cleanup.

Career Objective

To grow as a developer by building strong foundations in programming and web technologies, contributing to meaningful projects, and eventually creating modern websites and engaging game graphics experiences.
